## Mount Si High School *Construction Update*

### *In the News:*

#### **"New Mount Si High will sit atop 4,800 stone columns"**

The Daily Journal of Commerce recently interviewed NAC Architecture and reported on the unique new design of Mount Si High School. [Click here for the full story.](#) The story describes how NAC Architecture has partnered with the Snoqualmie Valley School District to create an innovative design that addresses the challenge of building on a flood plain with poor soil conditions, while developing a community asset that will meet the educational needs of Snoqualmie Valley students for years to come.

### **November Status Report**

Work continues on constructing the temporary parking lot area including off-site hauling, bringing in rock and gravel, building a storm drainage pond, and working on the underground drainage utility -- in what has been a month of record-setting rainfall. Read the [November 15 status report](#) from the project manager for a one-page summary of activity and a second page of photographs.

### **For more information:**

Find more details about this 2015 bond project and others on the district website at: [www.svsd410.org](http://www.svsd410.org). Select the **Facilities Planning and Construction** icon for progress on the projects.

*Thank you for supporting Snoqualmie Valley schools!*
