

Mount Si High School *Construction Update*

Watch a new video!

New Changes to MSHS Parking, Bus Zone & Main Entrance

Several changes will go into effect in January upon returning from Winter Break. The changes involve relocating Mount Si High School's main entrance and school bus loading zone to the back side of the school along Schusman Ave. SE, and opening a new parking area since the front lot will be closed off. To explain the upcoming transition, two resources have been created to help inform students, staff and parents how to access Mount Si High School starting next month:

- [Watch the video: Winter 2016 MSHS Construction Update](#) (2 min.) In addition to important logistical information, see time-lapse photography action at the beginning and end of the video.
- The [Parking Transitions Map](#) featured in the video details the new parking areas designated for students, staff and visitors. Students may want to print a copy for reference upon returning to school in January.

December Status Report

This month, steps to prepare the temporary parking lot for use by January included completion of the storm drainage pond and the underground drainage utility, hauling soil off site and hauling gravel and crushed rock on site, and asphalt paving of the new bus loop entrance. On the opposite end of the property, crews worked to assemble two huge cranes during the first day of significant snow in our region (*pictured left*). The cranes were then used to install the first stone column on December 6 -- one down, 4,799 to go! (*pictured right*). Read the [December 15 status report](#) from the project manager for a one-page summary and photos of recent activity.
