Contractor Selected for Mount Si HS Construction
Following a competitive bid process that closed on March 7, Spee West Construction Company, based in Edmonds, Washington, was named the general contractor for the construction of Mount Si High School. Among the three highly qualified companies with significant school construction experience that bid on the project, Spee West Construction came in with the lowest bid to win the contract. New AVID Program Helps Students Prepare for College
In addition to building a new high school facility, the District is also working to expand educational opportunities and support for Mount Si students. One example of innovative programming is a new college-readiness program, called Advancement Via Individual Determination (AVID), that was implemented for the first time this year. AVID is designed to help students improve their success in school and achieve their goals to attend and succeed in college. Snoqualmie Valley students enrolled in the program recently shared their AVID experiences and impressions.

Click here for the full story, which features a video of local AVID students telling their story.
March Status Report & Photos

With three drilling rigs running simultaneously (*pictured below*), 2,357 stone columns have been installed to date, for sub-grade reinforcement on the property. Construction also continues on the permanent and temporary sewer, water, and storm drainage systems. Read the [March 2017 Status Report](#) for a one-page summary from the Project Manager and more photos of recent activity.

*Work on installing the stone columns is running ahead of schedule, despite adverse weather conditions.*

**For more information:** Visit the District website at: [www.svsd410.org](http://www.svsd410.org) and click on the *Facilities Planning and Construction* icon for progress on bond projects.

Thank you for supporting Snoqualmie Valley schools!
