

Services & Facility Rentals

Please note: School administrators and staff do not have the authority to sign contracts or obligate the District.

Contact Business Services if you are interested in hiring people to provide services such as consulting, presentations, DJs, training, etc. Business Services will assist you in determining the necessary paperwork that is required. A contract may need to be issued and it must be completed and received from the vendor prior to the start of services. This process may take some time to complete, so please allow enough time to complete this step before the service begins.

If you wish to rent equipment or an outside facility for a school or District-sponsored event, please contact Business Services and make arrangements for review of the contract and the terms and conditions of use.

The purchase of software or licenses for the use of software requires the review of the software terms and conditions prior to purchase. Please contact the Technology Department for information.
