Today you will be taking a Washington State Geometry End-of-Course Practice Test. To complete this test, you will need to use the answer document provided with this practice test on page 23. This practice test is designed to simulate the Washington State Geometry testing experience.

Three different types of questions appear on this test:

<table>
<thead>
<tr>
<th>Multiple-Choice Items</th>
<th>Completion Items</th>
<th>Short-Answer Items</th>
</tr>
</thead>
<tbody>
<tr>
<td>Each Multiple-Choice item has four answer choices, the correct answer and three distractors.</td>
<td>Each Completion item requires the student to enter a numerical answer, an expression with variables, or an equation with variables.</td>
<td>Each Short-Answer item requires a constructed response.</td>
</tr>
<tr>
<td>Multiple choice items are worth one point each.</td>
<td>Completion items are worth one point each.</td>
<td>A Short-Answer item may ask the student to write a sentence or equation; complete a table, graph, or chart; draw a picture; construct a diagram; or perform a calculation.</td>
</tr>
<tr>
<td>There will be 29 Multiple-Choice items assessing PEs common to Geometry/Integrated Mathematics 2.</td>
<td>There will be 5 Completion items assessing PEs common to Geometry/Integrated Mathematics 2.</td>
<td>An Enhanced Multiple-Choice item will ask the student to select from a list of four answer choices and then show work to support or explain the reason(s) for choosing that answer or to solve a problem. No more than two items on a test will be Enhanced Multiple-Choice items.</td>
</tr>
<tr>
<td>There will be 3-5 Multiple-Choice items assessing PEs common to Geometry/Integrated Mathematics 1 and Geometry/Integrated Mathematics 3.</td>
<td>There will be 1-3 Completion items assessing PEs common to Geometry/Integrated Mathematics 1 and Geometry/Integrated Mathematics 3.</td>
<td>Short-Answer items are worth two points each.</td>
</tr>
</tbody>
</table>

NOTE: Enhanced Multiple-Choice items are scored as Short-Answer items.
While taking this test, remember:

1. Read each question carefully, including diagrams and graphs.

2. For multiple-choice questions, choose the best answer from the four choices given. Mark only one response for each multiple-choice question.

3. For short-answer questions, write your answers in the box provided. You do not have to use all of the space provided. Answers may be graphs, text, or calculations.

4. If a short-answer question asks you to show your work, you must do so to receive full credit. If you are using a calculator, describe the calculation process you used in enough detail to be duplicated, including the numbers you entered and the function keys you pressed to find the answer. If a short-answer item has multiple parts, label each section of work and clearly identify your answer for each part.

5. Record all multiple-choice and completion answers on the answer key located on page 23.

A formula sheet is provided for the Geometry End-of-Course Exam, and is provided on Page 21 and 22 of this Practice Test.

The Practice Test will be broken up into 3 different sections and will be completed in one sitting that will last approximately 150 minutes (there is no time limit):

Section 1: Questions 1-6
   * Logical arguments and proof

Section 2: Questions 7-29
   * Proving and applying properties of 2-dimensional figures

Section 3: Questions 30-37
   * Figures in a coordinate plane and measurement

* Be sure to answer all questions before you end each test session. However, do not spend too much time on any one question.

* If you do not know the answer to a question, make your best guess and go on to the next question.

* You will not be penalized for guessing.
GEOMETRY END-OF-COURSE EXAM: PRACTICE TEST

1. Seth was supposed to prove $\triangle ABC \cong \triangle PQR$ by SAS for his homework assignment. He wrote the following proof:

   Given $\angle ABC \cong \angle PRQ$, $AB \cong PQ$, and $BC \cong QR$, then $\triangle ABC \cong \triangle PQR$ by SAS.

Which statement should be changed in order for Seth’s proof to be correct?

a. $\angle ABC \cong \angle PRQ$ should be rewritten as $\angle ABC \cong \angle PQR$.
b. $AB \cong PQ$ should be rewritten as $AB \cong PR$.
c. $BC \cong QR$ should be rewritten as $AC \cong QR$.
d. $\triangle ABC \cong \triangle PQR$ by SAS should be rewritten as $\triangle ABC \cong \triangle PQR$ by SSA.

2. Which of the following best describes a counterexample to the assertion below:

   *Two lines in a plane always intersect in exactly one point.*

   a. Coplanar Lines
   b. Intersecting Lines
   c. Parallel Lines
   d. Perpendicular Lines

3. Which of the following statements is true:

   a. A postulate is a proven fact using theorems, definitions, and undefined terms.
b. A theorem is a proven fact using postulates, definitions, and undefined terms.
c. Some defined geometric terms are line, plane, and point.
d. Some undefined geometry terms are angle, ray, and line segment.
4. Given: \( \angle CBF \cong \angle CDG \), \( \overline{AC} \) bisects \( \angle BAD \).
Prove: \( \overline{AD} \cong \overline{AB} \)

Complete the flowchart proof.

Proof:

\[ \angle CBF \cong \angle CDG \]
Given

\[ \angle ABC \cong \angle ADC \]
1. __________

\[ \overline{AC} \text{ bisects } \angle BAD \]
Given.

\[ \angle BAD \]
2. __________

\[ \triangle ACD \cong \triangle ACD \]
3. Definition of angle bisector.

\[ \overline{AC} \cong \overline{AC} \]
4. __________

\[ \overline{AD} \cong \overline{AB} \]
5. __________

a. 1. Congruent Complements Theorem
2. \( \angle ACB \cong \angle ACD \)
3. Transitive Property of Congruence
4. CPCTC
5. AAS

b. 1. Congruent Supplements Theorem
2. \( \angle CAB \cong \angle CAD \)
3. Transitive Property of Congruence
4. AAS
5. CPCTC

c. 1. Congruent Supplements Theorem
2. \( \angle CAB \cong \angle CAD \)
3. Reflexive Property of Congruence
4. AAS
5. CPCTC

d. 1. Congruent Complements Theorem
2. \( \angle ACB \cong \angle ACD \)
3. Reflexive Property of Congruence
4. CPCTC
5. AAS
5. If an indirect proof is used to prove the following theorem, then which assumption must be proved false?

*If two lines form a pair of congruent corresponding angles, then the lines are parallel.*

a. The corresponding angles are congruent.
b. The corresponding angles are not congruent.
c. The lines intersect.
d. The lines do not intersect.

6. Given the statement:

**Conditional:** If the diagonals of a rhombus are congruent, then the rhombus is a square.

The inverse of the conditional statement is:

**Inverse:** If the rhombus is not a square, then the diagonals of the rhombus are not congruent.

Identify by writing yes/no on the first line below if the statement above has correctly identified the inverse of the conditional. If the inverse above is incorrect, correctly write it in the space below.

---

**Inverse of Conditional**

______________________________

______________________________

______________________________

______________________________

______________________________

______________________________

______________________________

______________________________
7. In \( \triangle ABC \), Point O is the centroid. BY = 18. Find BO.
   a. 6
   b. 9
   c. 12
   d. 27

8. Given that \( \triangle ABC \cong \triangle DEC \) and \( \angle E = 23^\circ \), find \( \angle ACB \).
   a. \( \angle ACB = 77^\circ \)
   b. \( \angle ACB = 67^\circ \)
   c. \( \angle ACB = 23^\circ \)
   d. \( \angle ACB = 113^\circ \)

9. Triangle JKE is an obtuse isosceles triangle with \( \angle E = 10^\circ \) and KE > JK.

   Which of the following is a possible measure of \( \angle J \)?
   a. 170°
   b. 160°
   c. 85°
   d. 10°
10. In the diagram:

**Given:** \( \triangle KLM \) is an isosceles triangle with vertex angle \( \angle KLM \) and \( \angle 1 \cong \angle 2 \).

**Prove:** \( \triangle LKP \cong \triangle LMN \)

Prove \( \triangle LKP \cong \triangle LMN \) using mathematical language and concepts.
11. Choose the true statement based on knowing point O is the orthocenter of triangle ABC.
   a. $\angle BDA \cong \angle CDA$
   b. $\overline{BO} \cong \overline{CO}$
   c. $\angle BAD \cong \angle CAD$
   d. $\overline{EO} \cong \overline{FO}$

12. Which triangles are congruent in the diagram?
   a. $\triangle HMN \cong \triangle HGN$
   b. $\triangle HMN \cong \triangle NGH$
   c. $\triangle NMH \cong \triangle NGH$
   d. $\triangle MNH \cong \triangle HGN$
13. Find the length of side MV.

a. 11
b. $11\sqrt{2}$
c. $11\sqrt{3}$
d. 22

14. A tree casts a shadow that is 150 feet long. If the angle of elevation from the tip of the shadow to the top of the tree is $30^\circ$, how tall is the tree to the nearest foot?

a. 87 feet
b. 106 feet
c. 212 feet
d. 259 feet
15. A rectangular prism is shown. The base of the prism is a square. The length of the diagonal from top corner A to opposite bottom corner B is 2 feet.

Determine the exact length of the box in inches.

Write your answer on the line.

What is the exact length of the box? _______________ inches

16. Which side lengths represent the sides of a right triangle?
   a. 1, 1, 2
   b. 2, 3, 5
   c. 5, 12, 13
   d. 7, 23, 25
17. Use the trigonometric ratio \( \sin A = 0.38 \) to determine which angle of the triangle is \( \angle A \).
   a. \( \angle 2 \)
   b. \( \angle 1 \)
   c. \( \angle 3 \)
   d. No Solution

18. Find the value of \( y \).
   a. \( y = 5 \cos 28^\circ \)
   b. \( y = 5 \sin 28^\circ \)
   c. \( y = \frac{5}{\cos 62^\circ} \)
   d. \( y = \frac{5}{\sin 62^\circ} \)

19. At takeoff, a plane flies at an angle of 10° with the runway. After it has traveled a ground distance of 2,800 feet, find the vertical distance the plane has gained from takeoff. Round your answer to the nearest foot.

Write your answer on the line below

Vertical Distance of the Plane in the Air to the Nearest Foot = ________________

20. In parallelogram PQRS the measures of angle P is 122°. What is the measure of angle Q?
   a. 122°
   b. 61°
   c. 116°
   d. 58°
21. Which statement can you use to conclude that quadrilateral XYZW is a parallelogram?

a. \( \overline{XW} \equiv \overline{YZ} \) and \( \overline{XY} \equiv \overline{WZ} \)

b. \( \overline{XW} \equiv \overline{WZ} \) and \( \overline{XY} \equiv \overline{WZ} \)

c. \( \overline{YN} \equiv \overline{NX} \) and \( \overline{XN} \equiv \overline{NY} \)

d. \( \overline{XW} \equiv \overline{YZ} \) and \( \overline{XY} \equiv \overline{YZ} \)

22. Which description does NOT guarantee that a quadrilateral is a parallelogram?

a. A quadrilateral with both pairs of opposite sides congruent.

b. A quadrilateral with the diagonals bisecting each other.

c. A quadrilateral with consecutive angles supplementary.

d. Quadrilateral with two opposite sides parallel.

23. In the following polygon, determine the value of x.

a. 78

b. 81

c. 95

d. 99

24. What is the sum of the exterior angles of a 15-sided polygon?

a. 24°

b. 180°

c. 360°

d. 2340°
25. What is the missing reason for the proof?

**Given:** Parallelogram ABCD with diagonal \( \overline{BD} \)

**Prove:** \( \triangle ABD \cong \triangle CDB \)

\[ \begin{align*}
1. \overline{AD} & \parallel \overline{BC} \\
2. \angle ADB & \cong \angle CBD \\
3. \overline{AB} & \parallel \overline{CD} \\
4. \angle ABD & \cong \angle CDB \\
5. \overline{DB} & \cong \overline{DB} \\
6. \triangle ABD & \cong \triangle CDB
\end{align*} \]

<table>
<thead>
<tr>
<th>Statements</th>
<th>Reasons</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. ( \overline{AD} \parallel \overline{BC} )</td>
<td>1. Definition of parallelogram</td>
</tr>
<tr>
<td>2. ( \angle ADB \cong \angle CBD )</td>
<td>2. Alternate Interior Angles Theorem</td>
</tr>
<tr>
<td>3. ( \overline{AB} \parallel \overline{CD} )</td>
<td>3. Definition of parallelogram</td>
</tr>
<tr>
<td>4. ( \angle ABD \cong \angle CDB )</td>
<td>4. Alternate Interior Angles Theorem</td>
</tr>
<tr>
<td>5. ( \overline{DB} \cong \overline{DB} )</td>
<td>5. Reflexive Property of Congruence</td>
</tr>
<tr>
<td>6. ( \triangle ABD \cong \triangle CDB )</td>
<td>6. ?</td>
</tr>
</tbody>
</table>

- a. Reflexive Property of Congruence
- b. ASA
- c. Alternative Interior Angles Theorem
- d. SSS

26. In the accompanying diagram of rectangle \( ABCD \), \( m \angle ABE = 30 \) and \( m \angle CFE = 144 \). Find \( m \angle BEF \).

\[ \begin{align*}
\text{a. } & 36^\circ \\
\text{b. } & 60^\circ \\
\text{c. } & 84^\circ \\
\text{d. } & 90^\circ
\end{align*} \]
27. In trapezoid DEFG, find \( m\angle D \).
   a. 44
   b. 72
   c. 108
   d. 136

28. Which of the following statements is always true of any rhombus ABCD?
   a. \( \angle A \cong \angle B \)
   b. \( AB \perp BC \)
   c. \( AC \cong BD \)
   d. \( AC \perp BD \)

29. In kite DEFC, if \( m\angle DCF = 20 \) and \( m\angle DEF = 80 \), find \( m\angle CDE \).

Write your answer on the line below

\[
m\angle CDE = \underline{\hspace{1cm}}
\]
30. Given Parallelogram ABCD with A(-6, -1), B(-5, 3), and the intersection of the diagonals E at (-2, \( \frac{1}{2} \)). Determine the coordinates of D.

Determine the coordinates of point D.

You may use the blank grid to help determine the solution.

Write your answer on the line.

**What are the coordinates of point D? ( _____, _____ )**
31. Isosceles triangle ABC has vertices at A(0, 0), B(8, 0), and C(x, 12).

The value of x could be:

a.  4
b.  8
c.  12
d.  16

32. What is the most precise name for a quadrilateral with vertices (-4, -1), (1, -1), (4, 3), and (-1, 3)?

a.  Kite
b.  Parallelogram
c.  Trapezoid
d.  Rhombus
33. A rectangular cabin is to have an outside dimension is 25 ‘ by 28’. You are asked to verify the diagonal distance to show the sides were square to within 2 inches of error.

Select which measurement would be the most appropriate level of precision?

a. 38 ft.

b. 27.537 ft.

c. 37 ft. 6 in.

d. 37 ft. 6.44 in.

Justify your answer in the space below.
34. What is the best estimate for the surface area of the prism?

![Prism Diagram]

a. 34 ft$^2$
b. 48 ft$^2$
c. 72 ft$^2$
d. 96 ft$^2$

35. Convert 20 miles/hour to meters/second (round to the nearest meter).

1 mile = 5,280 feet
1 foot = .3048 meters

Write your answer on the line below.

20 miles/hour = ______________ meters/second
36. There are 5 horses on 12 acres of land. What is the mean number of square yards per horse?
   1 acre = 43,560 square feet
   a. 8,712 square yards
   b. 11,616 square yards
   c. 34,848 square yards
   d. 58,080 square yards

37. On a coordinate grid, a grocery store is located at (3,0) and the hardware store is located at (4,3). If the hardware store is the midpoint between the grocery store and the pharmacy, what is the approximate distance from the hardware store to the pharmacy? (Note: 1 unit equals 5 miles)
   a. 7.5 miles
   b. 7.9 miles
   c. 15.8 miles
   d. 17.5 miles
# Mathematics Formula Sheets for End-of-Course Exams

Use at least two decimal place values when approximating square roots or trigonometric ratios.
